

NOT A MUZZLE

The Gentle Leader® is not a muzzle. Your dog will still be free to open its mouth to eat, drink, pant, bark and even bite. You will, however, be able to keep the dog's mouth closed if necessary with simple gentle upwards pressure from the lead.

Introducing the

Gentle Leader®

HEADCOLLAR

EFFECTIVE LEARNING

The Gentle Leader® headcollar allows a new concept in behavior management. You will be able to train your dog not to pull or lunge on leash when you are walking. Jumping on people, uncontrolled barking and begging will soon be under control.

GENTLE & HUMANE

The Gentle Leader® is exactly that, "GENTLE". It does not physically punish and, therefore, allows kinder interactions with your pet promoting an increase in the human-animal bond.

RAPID CONTROL

You will be amazed at how quickly you will be able to gain control and get the attention of your pet. Teaching basic commands such as sit, down and heel will be easy and rapid.

The Gentle Leader® has been carefully designed to allow the scientific use of the principles of learning. It offers people who love and respect their dogs a new way to promote desirable behavior through positive and reward based methods.

The neck strap applies a gentle pressure to the neck rather than the throat. The nose loop controls the head without discomfort. The combined effect works in conjunction with your dog's natural reflexes to produce an amazing calming effect.

Dogs in a pack respond instinctively to a leader. The Gentle Leader® humanely and effectively gives you control over your dog. The dog will quickly recognize and respond to the leadership that you will now be able to demonstrate.

SCIENTIFICALLY DESIGNED

USES NATURAL REFLEXES
